

NEW LADDER SYSTEM

An extremely cost effective solution consisting of specially designed pockets hung on horizontal bars. The pockets are designed with a square hanging so they remain still on the display.

Angled pockets can also be used so that lower placed information is effectively displayed. The sloping pockets are single sided only.

Available in various configurations of heights and widths, the units are available for wall mounting (35mm profile) or freestanding (50mm profile).

The freestanding units can also be used double-sided, so are ideal for use indoors to separate spaces.

(Prices are retail and exclude VAT and delivery. Prices are correct at time of going to press February 2007)

£379.00

NEW FREE STANDING UNITS

Created especially for estate agents, these units are ideal for placing in windows and interiors.

As well as being easy to move around and easy to change, they're a very stylish solution for displaying information.

The units are made from 5mm sand blasted acrylic and are fitted on freestanding bases that can be adjusted to different angles. Available in a 3 pocket or 6 pocket version.

Why not combine them with digital screens? The units can sit in front of a screen display to provide extra information about any products or services shown.
